SUBJECT:

Award of contract for Wastewater Biosolids Hauling Services

RECOMMENDATION:

Staff recommends the Mayor and City Council award a Services contract with Western Utility Contractors, LLC dba Overley's for the City of Casa Grande Wastewater Biosolids Hauling Services.

DISCUSSION:

This contract provides for the hauling and disposal of Biosolids generated from the Water Reclamation Facility (WRF) owned and operated by the City. Under this contract, the Biosolids are to be hauled to the City's Landfill, where they will be deposited. Landfill staff will then blend this material with imported soils and utilize it as cover material, which is required to be placed to maintain regulatory compliance. This process puts the material to beneficial use by providing an excellent cover and reduces the amount and associated costs of import soil required.

A formal solicitation requesting Proposals was posted, and three (3) firms submitted proposals for these services. After a review of bid and qualifications, staff determined the Overley's proposal to be in the best interest of the City.

This contract is to be for a term of two (2) years, with the option to renew for three (3) additional one-year terms.

The typical cost for disposal, based on current demands of 17,500 tons, is estimated to be approximately \$193,000 annually.

The price per unit hauled is to be adjusted annually based upon the percentage increase or decrease in the Consumer Price Index (CPI) during the previous Contract year.

FISCAL IMPACT:

Funds for these services are currently budgeted in an amount of \$216,000 in account 520-21-214-130-7302-10000 in the division's operating budget.
