The Truck with Packer is needed to alleviate a two part trash dumping method and excessive daily trips to the landfill. Currently approximately 120 individual trash containers, ranging in size from 30 to 96 gallons, are manually emptied 3 times a week throughout our parks system. These individual containers are dumped into utility dumpsters which are then emptied into a front load system garbage truck that is taken to the landfill. The addition of the new equipment will reduce the average 15 weekly trips taken to the landfill. The Truck with Packer would eliminate the need for manual dumping, increasing park crew efficiency, reducing work-related injuries and reducing the amount of weekly trips to the landfill.

**FISCAL IMPACT:**

The amount requested for the Truck with Packer is \$111,016.16. Funding of \$110,000 is available in the Parks Maintenance System Fee Improvements FY 2015 budget, account 204-01-540-4610-11, project number 1101.

Additional budget authority for the remaining \$1,016.16 was transferred from project number 1564, where there is a savings of over \$27,000 from the purchase of a consolidated Skid-Steer.
